Memphis Manufactures. It is gratifying to our community large to notice the complete success of the various manufacturing enterprises that have sprung up in our midst in the past few years. Our attention was called to this fact most forcibly yesterday by the ap-pearance on the street of two beautiful four-wheel hose-carriages, built for the pearance on the street of two beautiful four-wheel hose-carriages, built for the Taxing-District government by the Lilly Carriage Company. We have felt confident for years past that we have as fine mechanical talent in this city as there is in any city in the United States, although it seems a difficult matter to get our citizens generally to feel and act on this mat, ter as they should do. Much credit in this instance is due our Police and Fire Commissioners, and Chlei Cleary also, for the patronage of home institutions. This was done, however, on a confidence and absolute knowledge of procuring what they wanted, not only in the highest excellence of workmanship, but at cheaper rates than they could get the same articles abroad. The "Lilly" and "Shamrock"—the names of the two hose-carriages—are beauties in all respects. We feel proud that such work can be done in our midst, and the stockholders of the Lilly Carriage Company feel justly proud in being able to execute such work. They deserve the liberal patronage they are receiving.
